

ADULT CATS

RECOMMENDED VACCINE & DEWORMING PROTOCOL

Re-vaccinate 1 year after initial vaccine.

If given on time, this vaccine will last 3 years.

*Legally required: <https://www.ontario.ca/laws/regulation/900567>

Re-vaccinate 1 year after initial series.

Re-vaccinate every 3 years thereafter.

Re-vaccinate 1 year after initial kitten series.

Low-risk indoor-only cats: Optional thereafter.
Outdoor cats, or those who may have exposure to other cats outside their household: Consider re-vaccination annually or every 2 years depending on risk level.

**Does your cat spend time outside, hunt, or eat raw meat?
We will formulate an internal and external parasite
prevention program based on your pet's lifestyle.**

Lifestyle, previous vaccine reactions, zoonotic risk factors, and health status, are factors we consider when tailoring a preventative health program for your cat.
